

WELDING TECHNICIAN AND INTEGRATION OF ELECTRONIC EQUIPMENT

➤ DESCRIPTION

DAS PHOTONICS is an upcoming and pioneering Spanish High-Tech enterprise whose mission is to develop innovative solutions, based on proprietary, high-performance photonic technology for the defense and space sectors. In recent few years, quantum systems and communications have rapidly stormed into these fields with an exponential growth, providing both novel and unprecedented applications. Being aware of this, **DAS PHOTONICS is seeking strong candidates with a solid background in the field of Electronic, electrotechnical, automated or telecommunications.**

➤ MAIN RESPONSIBILITIES

- Manual assembly of PCBAs with SMT and PTH components
- Basic and assisted electrical test in PCBAs
- Rework on PCBAs under specifications
- PCBA repairs under engineering supervision
- Manufacture of wiring under specifications
- Assembly of modules and equipment
- Management of receptions and storage of materials
- Packaging and preparation of shipments

➤ QUALIFICATION REQUIREMENTS

- ✓ Certificate of Higher Education (HNC) in electronics Electronic Maintenance, Electrotechnical Systems and Automated.
- ✓ SMT and PTH welding on printed circuits
- ✓ Management of measuring devices in electronics (Laboratory sources, Oscilloscope...).
- ✓ English language spoken/written fluency and good communication skills.

DAS PHOTONICS offers a permanent position (indefinite contract from the beginning). Additionally, we are integrated in a highly technological environment where prestigious international projects are carried out and developed. Remuneration will be established according to experience.

If interested, please, send us both your CV and a motivation letter to rrhh@dasphotonics.com
