DAS Photonics

Position: HMI Engineer

DESCRIPTION

At DAS Photonics we want to count on you. We are looking for **an HMI engineer.**

Responsibilities

- Analysis and decomposition of HMI system requirements; Elaboration of the specifications of systems and subsystems.
- HMI system design (subsystem definition, interface design, HMI-specific process design).
- Development of applications in C++ on Linux.
- Support for the preparation of offers and test procedures, as support to other engineering firms.
- Availability to travel internationally for periods of several weeks.
- Work methodologies and planning.

What are we looking for?

- Be in possession of an Engineering or bachelor's degree in Electronics/Telecommunications or similar.
- At least 5 years of experience working in a similar position.
- English level B2.
- Experience in developing C++ applications on Linux
- Use of WT/QML library.
- Knowledge of GIT version control.
- Understanding and working knowledge of product design and processes.

What do we offer?

- Incorporation to a solid and leading company in its sector, working on projects worldwide.
- Good working environment in a dynamic team.
- Indefinite contract.
- Flexible working hours from Monday to Thursday (with intensive working hours on Fridays).
- Intensive schedule period in July & August
- Hybrid work model (2 days telecommuting + 3 days at the office).
