Position: PRODUCT ASSURANCE

DESCRIPTION

At DAS Photonics we want to count on you. We are looking for a **Product Assurance Engineer.**

Responsibilities

- Establish and supervise quality standards: reliability, usability and performance, technical know-how and best practices. Ensure the analysis and continuous improvement of the product or service.
- Provide process support for the execution of products or services.
- Define a Product Assurance Plan that describes the program and how it meets the objectives and requirements of the project.
- Prepare Progress reports on everything related to product warranty.
- Manage audits, critical items, non-conformities, and alerts.
- Support documentation (data control and quality records) and Configuration Management.

What are we looking for?

- Possess an Engineering or University Degree in Telecommunications, Electronics.
- English level B2.
- At least 5 years of experience in a similar position.
- Experience in implementing quality assurance programs.
- Experience in implementing preventive and corrective actions in the distinct phases of the product.
- It is valuable to know the quality standards of space, aeronautics, and/or electronic warfare equipment.
- Knowledge of QA tools, concepts and methodologies is a plus.

What do we offer?

- Incorporation to a solid and leading company in its sector, working on projects worldwide.
- Good working environment in a dynamic team.
- Indefinite contract.
- Flexible working hours from Monday to Thursday (with intensive working hours on Fridays).
- Intensive schedule period in July & August
- Hybrid work model (2 days telecommuting + 3 days at the office).
